

2-2 Total Disaster Risk Management - Good Practices2007 -

2-2-1. Purpose

The Asian Disaster Reduction Center (ADRC), the United Nations Office for the Coordination of Humanitarian Affairs (UN-OCHA) Kobe and International Recovery Platform (IRP), in consultation with stakeholders in Asia, have formulated a holistic approach to disaster risk reduction known as Total Disaster Risk Management (TDRM).

The first publication titled "Total Disaster Risk Management: Good Practices" is a user-friendly handbook on TDRM that originally was prepared for the United Nations World Conference on Disaster Reduction (WCDR) held on January 18-22, 2005 in Kobe, Japan. The second publication titled "Good Practices 2006 Supplement" was issued last year, and the third publication titled "Good Practices 2007 Supplement" is issued sequentially in this year. They describe the TDRM concept and relevant good practices, and are intended to facilitate the enhanced understanding of the TDRM approach and its applications.

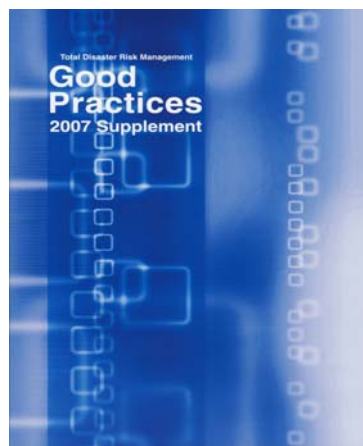

2-2-2. Contents

The good practices in disaster risk management activities by governments, local governments, universities, international organizations, NGOs and the general public are under compiling.

"Good Practices 2008" will be published on May 2008.
