

## **Acknowledgments**

This survey was conducted as a part of the Urgent Study of the Great Sumatra Earthquake and Tsunami Disaster, offered by Special Coordination Funds for Promoting Science and Technology of the Ministry of Education, Culture, Sports, Science and Technology (MECSST), Japan. We would like to extend our sincere appreciation to BAKORNAS, the Government of Indonesia for their cooperation to implement this survey. We also wish to thank GIS and Remote Sensing Development Center, Syiah Kuala University, for their efforts in advising for the survey method, and PT. Mori Kharisma, for the coordination of the survey team and supporting their activities in the field.
